UC Berkeley (2014-2018)

GPA: 3.3/4.0

Declared Major: B.S. EECS (Bachelor's of Science for Electrical Engineering Computer Science)

## **Experience**

### Web Developer Intern – Sandia National Laboratories, Livermore, CA (2016)

Worked on developing a cross-browser compatible scoped CSS Worked with SpringMVC, Leaflet, RequireJS, jQuery, Bootstrap Focused on cross-browser compatibility

Software Developer Engineer Intern – Amazon, San Francisco, CA (2017)

Created an internal tool from design doc to front end and back end. Used Guice, React, NodeJS and other interal technologies to create the whole system.

#### Skills

#### **Programming**

Proficient: Java, Python, HTML/CSS/JavaScript

Familiar: C, Swift, SQL

**Programs** 

Proficient: Photoshop/Sketch/Figma

#### **Projects**

**Plugd** (2015)

Designed the app UI for startup, where Plugd helps students find popular events around them. Design includes startup logo, unique icons, buttons, and more. Design is adaptable for all devices.

Gitlet (2015)

Built own version of Git in Java, implementing version control. Implemented functions such as commit, branch, and checkout.

Personal Website (2016)

Built my personal website using HTML/CSS/Javascript and Material to display projects I have worked on, information about me, and more.

### Involvement

#### FEMTech - FEMTech Share Coordinator (2016-2017)

Create beginner friendly workshops for women of all majors interested in technologies. In 2016, I helped create a web developer curriculum for members.

#### Web Design Decal - TA (2017)

Helped remake the programming curriculum. Also lecture programming slides to 50+ students. The course culminates in a personal website.

iOS Decal - Instructor (2016)

Taught a 100+ student led seminar about iOS app development. Students learn Swift and learn to create their own personal app.
